Roman P.

Java Developer

Solana Ventures is pleased to announce the results of Riptide, a global hackathon aimed at attracting the next wave of high-impact projects to the Solana ecosystem. Riptide is Solana's fifth hackathon and the first to bring together builders from around the world at Solana Hacker Houses. The hackathon brought together cryptocurrency pioneers and developers from around the world to build projects on the Solana blockchain spanning payments, DeFi, gaming, DAOs and everything in between. Solana Ventures is pleased to announce the results of Riptide, a global hackathon aimed at attracting the next wave of high-impact projects to the Solana ecosystem.
